

Mechanised Arboriculture

Fast, safe, affordable vegetation clearance.
Safer and more efficient than chainsaws!

HUMAN NATURE:
AT ITS BEST

Ground Control has been delivering mechanised vegetation and land clearance and management services since 1973. Our award-winning teams use the most advanced machinery to bring maximum efficiency and value to any large construction, rail or maintenance project.

Why choose our mechanical arb solutions?

Safety:

Our ROPs, TOPs, FOPs, and FISA compliant machinery effectively reduces working at height and manual handling activities

Cost savings:

Cheaper than traditional, manual services due to improved efficiencies and operations, with smaller footprint

Eco friendly:

Equipment runs on environmentally friendly hydraulic oil and all jobs can be assessed by our ecologists beforehand

Delivery:

Our state-of-the-art machinery, expertise and experience guarantees exceptional quality of work in the shortest amount of time

Quality:

Our award-winning service uses purpose-built machinery, operated by highly trained, competent teams

What we do

Our mechanical arboriculture division offers the following services:

Tree shearing • Whole tree chipping • Mulching • Site and land clearance • Excavations • Weed raking • Stump removal • Grass cutting • Ditching • Dredging • De-silting • Reinstatement works • Translocation of turf for wildlife habitats • Lake and lagoon creation • Riverbank reinstatement • Earth move

STATE-OF-THE-ART EQUIPMENT FOR HIRE

Menzi Muck

An extremely versatile machine with 9-tonne lifting capability, Engon system fitted for extra manoeuvrability and quick attachment changes. Comes with numerous attachments. Ideal for any terrain.

www.ground-control.co.uk/menzi

Kobelco SK270SRLC

Large 27-tonne base weight, 17m reach with extension arm, 550 mm cutting capacity. Comes with a wide range of attachments. Ideal for very large trees and long reaches.

www.ground-control.co.uk/kobelco

Case CX130D

Dual pumps, low ground pressure, fitted rubber trackpads, 350 mm cutting capacity. Comes with a wide range of attachments.

www.ground-control.co.uk/case

Kubota KX 080-4

Compact size, 250mm cutting capacity, low ground pressure, comes with a wide range of attachments. Ideal for sensitive, space-constrained sites such as wetlands.

www.ground-control.co.uk/kubota

Bandit 20XP 315HP Whole Tree

Radio remote-controlled, large whole tree chipper on a rubber-tracked base. 26/32" conveyer fed infeed, can produce 100 cubic metres of woodchip per hour.

www.ground-control.co.uk/bandit

Valtra T254 / 172 V

Fully forestry guarded with protective glass. Both come with a wide choice of attachments making them extremely versatile to suit all needs.
